

**AMD**  
*HR*

April 3, 2018

Dear Sir or Madam,

I would like to apply for the OpenGL/Vulkan engineer position advertised on your website. I am currently working as a graphics engineer for JibJab studios in Los Angeles California but am considering a move to my home country of Canada.

I have a passion for rendering and graphics. I have experience with OpenGL and am currently teaching myself Vulkan by developing a renderer from scratch. I have also gained experience with low-level hardware development during my time as a lab instructor for the University of Victoria's embedded platform and ARM assembly programming course. I have considerable experience with C++, am comfortable with both Windows and Unix, have strong foundational knowledge of computer architecture and am proficient in both 2D and 3D mathematics.

I have excellent personal skills. I am an experienced team leader, a natural independent thinker, and a concise communicator. I believe that my abilities would fit well with the OpenGL/Vulkan engineer role and that I would be a valuable asset to the AMD team.

Thank you for your time and consideration.

Yours faithfully,

**Nick Houghton**
