

## Software Engineer

Passionate software developer with advanced knowledge of rendering techniques and tools, 3D mathematics, game engines and hardware systems. AI, game-play and systems programmer. Multi-language developer. Proven use of software design patterns and architecture, development strategies and unit testing. Proven research experience. Proven experience with team leadership roles. Skilled in designing, developing, and maintaining software systems with a focus on building efficient and reliable products. **Areas of expertise include:**

- |                   |               |                  |          |
|-------------------|---------------|------------------|----------|
| • OpenGL          | • C++         | • GLSL           | • Java   |
| • Unreal Engine 4 | • Unity5 & C# | • 3D Mathematics | • Git    |
| • Assembly        | • JavaScript  | • Algorithms     | • Vulkan |

---

## PROJECTS

- **NickEngine: A Vulkan renderer:**
  - Implemented basic Vulkan renderer
  - Discovery, design and ongoing implementation.
- **Dead Earth: A first person shooter using Unity 5 and C#, Udemmy Course:**
  - Implemented AI enemies
  - Achieved blood effects with HLSL shaders
- **Jump-Ship: A 2D space shooter using Unity 5 and C#:**
  - Created weapon mechanics
  - Implemented AI enemies
- **Unreal Development Online Course:**
  - Completed two 3D games with UE4: Building Escape, Battle Tank
  - Improved on combat mechanics
  - Implemented AI tank enemies
- **Zombie-Hunt: A first person shooter made with OpenGL and C++:**
  - Implemented AI enemies
  - Created a custom renderer

---

## EXPERIENCE

- **JibJab Studios** Marina Del Rey, California  
*Software Engineer* May 2017 - Present
  - Developed and maintained a render library in both OpenGL and WebGL
  - Artwork and content pipeline integration
  - Spearheaded development and operation of a mass gif rendering system using Java and AWS
  - Installed render library with EmberJS, React and iOS applications
  - Implemented shell scripts to automate render tasks using FFMPEG
- **Ocean Networks Canada** Victoria B.C.  
*Software Engineer* May 2016 - Apr 2017
  - Developed large scale oceanic data API with JavaEE
  - Performance analysis and optimization
  - Designed and developed user-facing features using Javascript, HTML5 and CSS3.
- **University of Victoria** Victoria B.C.  
*Hardware Security Fellow* May 2015 - Dec 2016
  - Developed a hardware trojan detection application using Java
  - Designed and implemented a prototype of a new homomorphic encryption algorithm using C++.

---

## EDUCATION

- **University of Victoria** Victoria B.C. Canada  
*Masters of Applied Science in Computer Engineering* May. 2015 - Dec. 2016
- **University of Victoria** Victoria B.C. Canada  
*Bachelor of Engineering in Computer Engineering* Sept. 2010 - Apr. 2015
