Software Engineer

Passionate software developer with advanced knowledge of rendering techniques and tools, 3D mathematics, game engines and hardware systems. AI, game-play and systems programmer. Multi-language developer. Proven use of software design patterns and architecture, development strategies and unit testing. Proven research experience. Proven experience with team leadership roles. Skilled in designing, developing, and maintaining software systems with a focus on building efficient and reliable products. **Areas of expertise include:**

- Unity 5
- Unreal Engine 4
- Blender
- C++
- GLSL
- JavaScript
- C#
- 3D Mathematics
- Algorithms
- OpenGL & WebGL
- Git
- Java

PROJECTS

- **Dead Earth: A first person shooter using Unity 5 and C#**:
  - Implemented AI enemies
  - Achieved blood effects with HLSL shaders
- **Jump-Ship: A 2D space shooter using Unity 5 and C#**:
  - Created weapon mechanics
  - Implemented AI enemies
- **Unreal Development Online Course**:
  - Completed two 3D games with **UE4**: Building Escape, Battle Tank
  - Implemented AI tank enemies
  - Designed a main menu
  - Improved on combat mechanics
  - Designed battle landscapes
- **Zombie-Hunt: A first person shooter made with OpenGL and C++**:
  - Implemented AI enemies
  - Created a custom renderer
  - Created weapon animations in *Blender*
  - Created a custom .OBJ file importer

EXPERIENCE

JibJab Studios — Marina Del Rey, California
Software Engineer — May 2017 - Present
  - Developed and maintained a render library in both OpenGL and WebGL
  - Spearheaded development and operation of a mass gif rendering system using java and Amazon Web Services (AWS)
  - Installed render library with EmberJS, React and iOS applications
  - Implemented shell scripts to automate render tasks using FFMPEG

Ocean Networks Canada — Victoria B.C.
Software Engineer — May 2016 - Apr 2017
  - Developed large scale oceanic data API with JavaEE
  - Improved server performance using JMeter load testing
  - Designed and developed user-facing features using Javascript, HTML5 and CSS3.

University of Victoria — Victoria B.C.
Hardware Security Fellow — May 2015 - Dec 2016
  - Developed a hardware trojan detection application using Java
  - Designed and implemented a protoype of a new homomorphic encryption algorithm using C++.

EDUCATION

University of Victoria — Victoria B.C. Canada
Masters of Applied Science in Computer Engineering — May. 2015 – Dec. 2016

University of Victoria — Victoria B.C. Canada
Bachelor of Engineering in Computer Engineering — Sept. 2010 – Apr. 2015
